Automation

The Alpaca robot is a state-of-the-art blister packing machine. It was designed and created by the world's largest pharmacy automation equipment manufacturer with the user experience at the forefront. Holding 60 canisters at a time, the slender design optimizes space and efficiencies in any pharmacy. The software that powers the Alpaca seamlessly integrates with all major pharmacy dispense systems.

ADVANTAGES OF AUTOMATION

For your pharmacy

· Improved operational efficiency
· Scale for future growth
· Improved stock management
· Increased accuracy
· Affordable/reduced labour costs
· Efficient workflow
· Less stock & better cash flow
· Improved safety
· Improved business productivity

For your staff

· Streamlined work practices
· Improved moral
· Reduced stress
· Increased confidence while packing

For your customers

· Improved health outcomes
· Improved customer service and satisfaction
· Reduced packing errors

TECHNICAL SPECIFICATIONS

Powered by myPak software

Dimensions	900W x 600D x 2000H
Pack per hour*	25-40
Power outlets	2
Data oulets	2
Canister capacity	60
Storage draws	2

Multidrop technology	✓
17' Colour screen	✓
Wheels	✓
LED Draw Lights	✓
Security Cover	✓
Cleaning schedule	✓
Barcode Technology	✓
Erganomic design	✓

Optimize space and efficiency with multiple layout options

*Depending on complexities of manual fills and pharmacy process adoption

AUTOMATION OPTIONS TAILORED FOR EVERY PHARMACY

1* Colour printer comes with starter ink. Ink cartridges can be ordered via myPak Solutions
2** Additional canisters $250 + GST each, ordered in lots of 10

INSTALLATION PROCESS

```
Contract          →    Install myPak       →    myPak software
signed and             Software (if not         training for staff
deposit paid           already                  - 2 modules
                       installed)
```

```
Installation,     ←    Place canister      ←    Generate
training and go        order 4-5 week           canister list
live with the          lead time                (unless already
Alpaca                                           ordered)
```

Testimonials

"We are always seeking efficiencies in our store, with growth across dose administration aids a key customer growth focus area for us as some of the most valuable customers. MyPak provides a good software that is willing to work with you on solutions for your needs, not just a cookie cutter approach of this is how it will work. The software is modern and integrates better with our dispensing software then previous suppliers, and is all housed in one program as opposed to add on modules at increasing costs per program and monthly ongoing fees. They use a logical approach in printing, the image files print on plain paper, all the foils for the various pack types print on one foil. With our rate of growth, our projections were in the next 12 months I would either need to have the staff work an extra 7 hours per week on packing, or we moved to automation. We are so glad we did, as now the girls enjoy a more seamless packing process with time to spare, and we enjoy better returns without the feeling of guilt as new patients sign on.
Everybody wins!"
Justin Smith
Kooringal Pharmacy, NSW

"I purchased an Alpaca 6 weeks ago. It has revolutionized our packing. We pack for 100 home based community patients in our pharmacy and there was just no way that we could increase the amount of patients that we were packing for without some sort of automation. We took the plunge, purchased the machine and yay with the 6th CPA funding that has just come through we are now getting more funding for our DAA's. It's been a very good move."
Gia Cecchele
Amcal Inglewood Pharmacy, WA
