Sun Crossing any		Balling and		San 1000	S.r

### Step 2

Remove the plastic backing from the solid card

## Step 3

Insert the card and blister into the platen

	0		•		
1					
1					

### Step 4

Pack medication according the patient profile displayed on the foil or from the guided fill screen via the myPak software

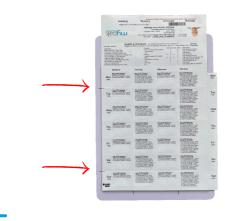

### Step 5

Once all the medication has been packed, peel back the label at an angle from the " 🖛 PEEL HERE" corner. Leave the blue films intact as depicted below.

### Step 6

Align the small black lines on sticky foil label with the black lines on the platen. Seal the pack and use the roller to ensure best adhesion of the pack.

Step 7

Remove the blue film as shown below and fold at the perforated edges to create the header and side labels.

Step 8

# **Completed Pack**
