Step 2

Peel back the plastic backing to expose the glue on right hand side of the TriFold card. Leave the middle section intact.

Step 3

Align the TriFold card cut-outs over the Platen, then carefully insert the blister size of choice into TriFold card

Step 4- remove

Apply the roller over the blister and card to ensure best adhesion

Step 5

Pack medication according to the patient profile displayed on the TriFold label or from the guided fill screen via the myPak software

Step 6

Once all of the medication has been packed, peel back remaining backing to expose glue on the card (middle section). Fold the exposed middle section to the seal pack

Step 7

Use the roller to ensure best adhesion to the pack

Step 8

Apply the labels as directed below

Completed Pack
