Alpaca UC

Equipped with a suite of advanced features designed to redefine medication packing.

The Alpaca UC represents a groundbreaking advancement in automation, promoting accuracy, flexibility and efficiency. This innovative solution is poised to redefine the standards of medication management in pharmacies, fostering a new era of operational efficiency.

# Main Features

## *An innovation in canister recalibration*

### Variable Canister

Variable Canisters can be adjusted without the need for a new canister. Canisters are recalibrated in Australia which significantly reduces lead times, offering flexibility and increasing operational efficiencies.

### Universal Canister

Universal Canisters can adapt to various medications without the need to be adjusted. Canisters can be used as a temporary or permanent solution offering flexibility and saving time. Half tab UC are available which reduce the need for manual fill.

### Other Features

- Canister optimization
- Compact footprint
- Increased safety and accuracy through scanner information checks
- Easy to clean
- Reduced Manual Fill

### myPak Blister Cards Available

A variety of DAA packs to choose from, specifically tailored to meet the varying requirements of patients and healthcare providers.

Blister Cards available:

- Perforated packs
- Solid packs
- Trifold packs
