SOLUTIONS

software consumables automation

BLIENT

Compact, highly efficient, accurate and suitable for most existing pharmacy DAA layouts.

* myPak supply with DN Touchscreen with integrated scanner

**Recommended
Customer Profile**

Compact, Easy to Maintain, Versatile.

Specifications

- Number of Canisters : 88 Canisters (77 SS-Size, 11 M-Size)
 - With ability to switch seamlessly
- Manual Fill Support Unit : DTA Unit

Main Features

1 Continuous and Efficient Workflow-Design

Continuous packing process that allows a single operator to complete any manual fill component while the machine completes the automated packing.

2 Adaptable for Manual-Filling

For more efficiency, Yuyama has developed an integrated DTA (Detachable Tablet Adapter) tray for manual fill operations.

In the instance there is no canister for a certain drug, the user can manually fill medications into the pack.

Integrated software on board the Blient guides the user on manual fill locations preventing misplacement of medication.

3 myPak Blister Cards Available

A variety of DAA packs to choose from, specifically tailored to meet the varying requirements of patients and healthcare providers.

Blister cards available

- Perforated Packs
- Solid Packs
- Trifold Packs

Other Features.....

1. Compact footprint provides packing capabilities in limited workspaces.
2. Increased safety and accuracy through scanner information checks.
3. Simplified medication path for easy-cleaning and cross-contamination prevention.
